ADD TO CART

- User can change models here, just like previous page, will refresh this page with appropriate list of products.

- Put the description first, then the ID. Would this benefit your users?
- Can we put some character like a pipe between the name & ID to help differentiate?

- Initial order of this list should be appropriate for your users.
- Sortable columns?
- Build consistent naming into product database.

- Note: underline denotes link to detail pop-up.
